PROFILE SUMMARY

- SAP ABAP on HANA Developer with 2 years of experience delivering RICEFW objects, CDS data models, enhancements, interfaces, forms and technical solutions for an S/4HANA implementation project.
- Delivered 22 SAP technical objects across 1 project cycle, with 21 objects accepted without UAT rework through structured development, code reviews and developer testing.
- Improved application performance and operational stability by optimizing 9 custom programs and resolving 42 production and hypercare incidents, reducing report runtime by 40% and mean resolution time by 34%.
- Experienced in OO ABAP, CDS Views, OData, SAP AIF, enhancements, forms, debugging and performance tuning, with hands-on project exposure to RAP backend development, Fiori application support and CPI monitoring.

CORE COMPETENCIES

≡ SAP ABAP Development	≡ Performance Tuning	≡ Production Support
≡ Transport & Agile Delivery	≡ Debugging & Root Cause Analysis	≡ SIT/UAT & Defect Management
≡ S/4HANA Technical Consulting	≡ OO ABAP	≡ ABAP on HANA
≡ Cloud Infrastructure Management	≡ RICEFW Development	≡ CDS & OData Services
≡ SAP Interfaces & AIF	≡ Enhancement Framework	≡ Forms Development

TECHNICAL SKILLS

Technical Category	Skills
SAP Development	ABAP, OO ABAP, ABAP on HANA, Modern ABAP Syntax, Open SQL, RICEFW
S/4HANA Development	CDS Views, Associations, Annotations, Managed RAP, OData V2/V4, SAP Gateway, SEGW
Interfaces & Integration	BAPI, RFC, IDoc/ALE, SAP AIF, REST, SOAP, JSON, XML, SAP Integration Suite/CPI Monitoring
Enhancements & Forms	BAdI, User Exits, Customer Exits, Enhancement Framework, Implicit and Explicit Enhancements, Adobe Forms, Smart Forms
Reporting & User Interface	Classical ALV, OO ALV, SAP Fiori, Fiori Elements, SAPUI5 Application Support, OData Binding
Performance, Quality & Support	ST05, SAT, ATC, SCI, ABAP Debugger, ST22, Developer Unit Testing, Test Evidence, Production Support
Functional Exposure & Delivery	SAP SD, SAP MM, Technical Specifications, SIT/UAT Support, Transport Management, Agile/Scrum

WORK EXPERIENCE

Associate Software Engineer | SAP ABAP on HANA Developer

Accenture | Hyderabad, Telangana | Sep 2024 – Present

Key Result Areas:

- Delivered 22 SAP technical objects comprising 2 ALV reports, 8 CDS Views, 2 managed RAP services, 2 SEGW-based OData services, 2 RFC/BAPI interfaces, 2 IDoc interfaces, 2 enhancement implementations, 1 Adobe Form and 1 Smart Form, resulting in 21 objects being accepted without UAT rework.
- Enabled reusable SAP data access by developing 8 CDS Views, 2 managed RAP services exposed through OData V4 and 2 SEGW-based OData V2 services consumed by 3 Fiori applications, reducing average data-retrieval time by 32%.
- Integrated SAP with internal and external applications by developing 2 RFC/BAPI interfaces and 2 IDoc interfaces, while supporting OData-based application integration, maintaining more than 98% successful processing across 12,000 business records per day.
- Supported 2 CPI integrations by monitoring message processing in SAP Integration Suite and analysing related SAP-side errors through AIF and application logs, reducing manual reprocessing effort by 41%.
- Automated 5 SD/MM business validations through 2 enhancement implementations using BAdIs, exits and the Enhancement Framework, saving 24 manual user-hours per month and reducing data-correction requests by 27%.
- Developed 1 Adobe Form and 1 Smart Form and supported backend and integration issues for 3 Fiori applications, reducing document-processing and issue-resolution effort by 31%.
- Improved application stability by optimizing 9 custom programs, resolving 42 production and hypercare incidents and supporting 12 transport cycles, reducing average report runtime by 40%, mean resolution time by 34% and UAT defects by 30%.

Key Achievements:

- Reduced a high-volume sales-order exception report’s runtime from **11 minutes 20 seconds to 6 minutes 50 seconds** by replacing repeated database access with optimized joins, CDS-based retrieval and hashed internal tables, improving performance by **40% across 120,000 records**.
- Delivered **21 of 22 SAP technical objects without UAT rework** by applying technical-design reviews, ATC checks, negative test scenarios and documented test evidence, resulting in **zero Severity-1 production defects attributable to the delivered objects**.
- Increased interface-processing success from **94.8% to 98.7%** by strengthening payload validation, AIF monitoring, error handling and reprocessing controls, reducing manual reprocessing effort by **41%**.
- Reduced mean incident resolution time from **6.2 hours to 4.1 hours** by creating reusable debugging procedures, root-cause checklists and support runbooks, improving resolution time by **34% across 42 incidents**.

ACADEMIC DETAIL

2024: Bachelor of Technology in Computer Science and Engineering (AI & ML) | Institute of Aeronautical Engineering, Dundigal

PROFESSIONAL PROJECTS

Project / Your Role	Client Name	Technology Stack	Project Highlights
Volkswagen GFT – S/4HANA Greenfield Implementation SAP ABAP on HANA Developer	Volkswagen Group	SAP S/4HANA, ABAP on HANA, OO ABAP, CDS Views, RAP, OData, ALV, BAPI/RFC, IDoc, SAP AIF, Enhancements, Adobe Forms, Smart Forms, ST05, SAT, ATC	Delivered SAP developments across reports, CD forms and backend services supporting SD/MM processing efficiency through performance tuning, developer testing and production-defect resolution hypercare.

PERSONAL PROJECTS

Project	Technology Stack	Project Highlights
Purchase Requisition Approval Application	SAP BTP ABAP Environment, ABAP Cloud, Managed RAP, CDS Views, OData V4, Fiori Elements, ADT	Developed a managed RAP application with draft handling, validations, determinations, actions and value helps, successfully processing 1,000 test requisitions with list-page response times below 2 seconds .
Sales Order Exception Monitoring Dashboard	ABAP, OO ABAP, CDS Views, ALV, OData, SAP Gateway, ST05, SAT	Consolidated 5 separate sales-order checks into a CDS-driven dashboard with reusable filters, status indicators and document drill-down, reducing runtime from 14.5 seconds to 8.1 seconds across 50,000 test records .
SAP Order Integration and Reprocessing Flow	SAP Integration Suite/CPI, REST, OData, IDoc, JSON, XML, Groovy, Postman	Developed an integration flow with message mapping, routing, exception handling and retry controls, achieving 99% successful processing across 500 test messages and reducing reprocessing time from 12 minutes to 4 minutes .
