

PAVAN KOLIPAKA

Full Stack Software Engineer | Java | Spring Boot | React.js | Next.js

Hyderabad, Telangana | +91 9154163010 | Kolipaka.pavan.kp@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of experience delivering Java and Spring Boot services and building React.js and Next.js applications. Improved release success from 92% to 99.3% and reduced API latency by up to 50% while collaborating with cross-functional teams on production support, knowledge transfer, and multi-service delivery.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, TypeScript

Backend: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, REST APIs, Microservices, Kafka

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, shadcn/ui

Databases: MySQL, PostgreSQL, Redis, Appwrite

Cloud and DevOps: AWS, Docker, Kubernetes, Maven, Git, CI/CD

Testing: JUnit 5, Mockito

Monitoring and Support: ELK, Kibana, Zipkin, Sentry

Core Areas: Full Stack Development, API Development, Performance Optimization, Production Support, Debugging, Release Validation

PROFESSIONAL EXPERIENCE

Accenture | Associate Software Engineer

Hyderabad, Telangana | Sep 2024 - Present

- Coordinated JDK 8 to 11 migration across 5 modules and 14 services, aligned with cross-functional teams to retire nearly 30% of legacy APIs, standardized Maven, Docker, and CI workflows, doubled deployment frequency, and raised release success from 92% to 99.3%.
- Analyzed high-traffic API behavior and optimized request flow, reducing p50 latency by 50% and p95 latency by 43%, increasing peak throughput by 2.2x, and lowering infrastructure cost per request by 17%.
- Built a release-validation utility for post-deployment checks, reducing manual verification time from 45 minutes to 11 minutes, improving pre-rollout defect detection by 35%, and enabling adoption across 3 teams within 2 sprints.
- Resolved 10+ production-grade defects through root-cause analysis, failure reproduction, and backend fixes across Spring Boot services.
- Expanded API and validation coverage across at least 5 services, partnering with service owners to strengthen request handling, data checks, and implementation consistency.
- Integrated company AI tools across 2 IDEs - VS Code and IntelliJ IDEA - and led knowledge-transfer sessions for 8 team members, reducing resolution time for 3+ P3 tickets by 45% within one sprint.
- Closed 40+ P2 and P3 incidents, reduced MTTR from 2.4 hours to 1.3 hours, documented 12 runbooks, and supported 8 cross-team deliveries through structured handoffs and clear issue communication.

PROJECTS

Patient Management Application | Next.js, TypeScript, Appwrite, Tailwind CSS, shadcn/ui, Twilio, Sentry | [Live](#)

- Created a healthcare workflow application covering 5 core flows: patient registration, appointment booking, scheduling, confirmations, and cancellations.
- Integrated 3 platform services - Twilio, Appwrite, and Sentry - to support messaging, authentication and storage, and issue monitoring.
- Instrumented core flows with Sentry to improve issue visibility and support faster debugging across patient and admin journeys.
- Shipped a responsive interface for consistent usage across desktop and mobile devices.

Archy AI | React, TypeScript, Vite, Tailwind CSS, Puter, Claude, Gemini | [Live](#)

- Developed an AI-powered SaaS platform that converts 2D floor plans into photorealistic 3D renders.
- Added 5 core product capabilities: comparison views, export workflows, privacy controls, project galleries, and a community feed.
- Structured reusable components and cloud-connected workflows to support scalable project handling and smoother user experience.

Zentry-Inspired Interactive Website | React.js, GSAP, Tailwind CSS | [Live](#)

- Built an interactive web experience using 4 motion patterns: scroll-based animation, clip-path transitions, 3D hover effects, and video-led storytelling.
- Crafted responsive layouts and motion-driven interactions to improve visual engagement across devices.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (AI & ML)

Institute of Aeronautical Engineering, Dundigal | Nov 2020 - Jun 2024
